

Cables for (Para)medical applications

Thanks to extensive product knowledge and continuing development, Velda Cable Technics has become a true partner for the assembly of cables for all types of medical and paramedical applications. We work closely together with manufacturers of mobile and adjustable furniture for medical and paramedical purposes such as hospital beds, wheelchairs, operating tables and dentist's chairs. Next to this, we also assemble cables for all sorts of medical equipment, orthopaedic materials, revalidation appliances, fitness equipment, and so much more.

Because of the strict tolerance requirements within the medical and paramedical sector, we assemble very precisely and accurately the required cables for their specific application. Innovation, precision, quality and just-in-time delivery are our company's strong qualities.

Quality cables since 1935

Why opt for Velda Cable Technics?

As a European-based company with a high-performance unit in Asia, we focus on big-volume cable production and assembly following the European certification systems.

Our logistic activities are coordinated and centralized in Europe. The smaller series are produced in our Belgian production unit. This combination guarantees flexible stock conditions and just-in-time deliveries at sharp prices.

In short, Velda combines flexibility and sharp prices with European top quality.

Custom made goods

We control and supervise the entire production process. We can produce almost any kind of cable, suspension, etc. on demand. Contact our commercial department to inquire about your specific needs.
