

Safety cables for Events and other safety purposes

In the area of safety cables, Velda Cable Technics is a leading player in the European market. Within our business unit Velda Safety, we focus on different important activities. On the one hand we assemble all kinds of safety cables for the safety industry, such as cables for fire protection and anti-theft cables for computers, outdoor furniture, etc. In the entertainment industry on the other hand, our cables provide for a secure suspension and attachment of mechanical and technical materials and equipment at places where people walk under them. We also have our own Velda Safety Cable product line existing of a standard range of safety cables for amongst others, distributors of light and sound materials and DJs.

Furthermore, we also focus on the installers in the architectural and building sector to secure their materials, like hot air blowers, air conditionings, sprinkling systems, etc.

Our safety cables prevent materials from falling down in case of potential failure or unintentional release of attachments. For this, we assemble the necessary suspension and safety systems with cables and adapted clamps and hooks to secure decors, sound equipment, light fittings, hot air blowers, air conditionings and other equipment to load receptors like truss pipes and theatre elements. Thanks to the perfect support of our engineering services, we assemble the custom safety cables for your project.

Quality cables since 1935

Safety cables for Events and other safety purposes

Why opt for Velda Cable Technics?

As a European-based company with a high-performance unit in Asia, we focus on big-volume cable production and assembly following the European certification systems.

Our logistic activities are coordinated and centralized in Europe. The smaller series are produced in our Belgian production unit. This combination guarantees flexible stock conditions and just-in-time deliveries at sharp prices.

In short, Velda combines flexibility and sharp prices with European top quality.

Custom made goods

We control and supervise the entire production process. We can produce almost any kind of cable, suspension, etc. on demand. Contact our commercial department to inquire about your specific needs.
