

Quick Suspension system

Velda Quick Suspension System (QS System), is the newest quick suspension system by Velda Cable Technics, ideal for a simple and revolutionary installation of electricity, HVAC, pipes, artificial ceilings, signalisation...

Apart from being easy to fix and to manipulate, the universal lightweight QS System is ready-for-use, which makes it the ideal tool for all kinds of installations.

Moreover, it helps to reduce physical discomforts and repeated actions during installation, as well as the use of portable electrical equipment and, consequently, the risk of falling.

The Velda QS System is suited for a wide variety of applications and offers the perfect solution for the suspension of:

pipe lines, heating, ventilo-convectors, air distributors, round and rectangular ventilation channels, aircocassettes, chilled beams, lighting, leading light lines, stream rails, span cables, refrigerators, signalisation, decoration, acoustic panels, loud-speakers, artificial ceilings, support...

Velda QS No. 1 (3,00 mm)

Velda QS No. 2 (3,00 mm)

Quality cables since 1935

CABLE TECHNICS

Quick Suspension system

The Velda QS System can be combined with **2 types of cables**: firstly with a cable of **1,50 mm** diameter and secondly with a cable of **3,00 mm**.

Both types can be delivered in **two colours: aluminium and black**.

The safe working load is defined to a 1 to 5 ratio of the calculated breaking load and includes a considerable safety margin.

	Diameter	Recommended working load
1	1,50 mm	0 - 45 kg
2	3,00 mm	45 - 90 kg

Depending on the intended application, one can choose between **3 possible systems**:

1. THE VELDA LOOP SYSTEM (LS)

The universal Velda Loop System (LS) can suspend, support or secure various components. This system replaces threaded rods and makes saws, files and nuts redundant during installation. This system takes up little space, is easy to transport and to install.

2. THE VELDA SPLIT-FIT SYSTEM (SF)

This completely adjustable suspension system is provided with 2 fixing points, and is thus very convenient for suspending cable ducts, light fittings, coolers...

3. THE VELDA SPLIT-FIT PIPE SYSTEM (SFP)

The Velda Split Fit Pipe System guarantees an easy and perfect suspension of any type of piping, composed of 2 tubes ranging from DN10 to DN65 (3/8 to 21/2).

The 200 mm pre-mounted spread-plate makes it easy to tighten and fix 19 or 32 mm hot water conduits.

ADVANTAGES

- Time-saving: very quick installation
- Self-locking
- Adjustable without unlocking key
- Stylish, beautiful design
- Ready-to-use and universal
- No tools needed for setting and adjustments
- User-friendly
- Dismountable
- Safe: certified
- Can be delivered separately

Finishes

THE VELDA QS SYSTEM CAN BE DELIVERED SEPARATELY OR WITH THE FOLLOWING FINISHES:

Our various finishes help you to select the most suitable solution for your construction project:

1. Loop finish (LA)
2. Thread finish (DA6, DA8, DA10)
3. Cross joint (DW)
4. Hook finish (HA)
5. Eye finish (OA)
6. Eye finish 45° (OA45)
7. Eye finish 90° (OA90)
8. End stop (EA)
9. Female threaded bushing (BA)
10. Magnet finish (MA)
11. Swivel clip finish (DCA)

For custom-made finishes, catalogue and pricelists, do not hesitate to contact us.
